- 3) References AA to AC are in English. English Abstracts for references AD and AE are enclosed. Reference AF includes an English abstract. Reference AD corresponds to AB; and AE corresponds to AC; from which the relevance can be determined in English. Therefore, no further discussion of the references is required.
- 4) Moreover, the enclosed Search Report indicates the degree of relevance of each of the references AA and AD to AF by category (A = technological background). Also note that the enclosed English translation of the International Preliminary Examination Report indicates that all claims of this application meet the patentability criteria of novelty and non-obviousness relative to the cited prior art. Thereby, a concise explanation of the relevance has been provided (see M.P.E.P. §609).
- 5) The Examiner is requested to consider all references of record, return an initialed copy of the enclosed Form PTO-1449 and ensure that all references of record are printed on any patent issuing from this application.
